

# AARTI MAKWANA

## SOFTWARE DEVELOPER

Ahmedabad, Gujarat, India | aartimakwana75@gmail.com | +91-8200356685

### PROFESSIONAL SUMMARY

Java Developer with 4.5 years of experience building scalable enterprise applications using Java, Spring Boot, Hibernate, REST APIs, and Microservices architecture. Skilled in designing secure, high-performance backend systems, database management, and API development. Proven track record of delivering robust solutions across government and enterprise projects, with strong problem-solving abilities and a commitment to clean code, performance optimization, and continuous improvement.

### TECHNICAL SKILLS

|                                                                                                  |                                                                    |

KEY PROJECTS

RESULT++

CONFIDENTIAL

ISRO

- Project details are confidential under non-disclosure agreements.

PC/Printer Complaint Management System

ISRO

Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, REST APIs, Maven, Git

- Developed a PC and Printer Complaint Management System using Spring Boot to streamline the reporting, tracking, and resolution of IT-related issues.
- Implemented secure user authentication and role-based access control using Spring Security.
- Enabled employees to register complaints for PCs and printers, while administrators and support engineers can assign, monitor, update, and resolve tickets through a centralized dashboard.
- Designed RESTful APIs, integrated a MySQL database for complaint tracking, and provided status updates and reporting features to improve issue resolution efficiency and IT support management.

Telephone Request Management System

ISRO

- Integrated email notification system for automated reminders and status updates to relevant stakeholders.
- Designed and implemented a secure authentication and authorization module to control user access based on roles and telephone request.
- Developed a custom module for managing telephone requests, approvals, and problem resolution with integrated email reminders.
- Engineered a robust reporting module to track request fulfillment times and identify bottlenecks, providing actionable insights for process improvement.

Hire Taxi Management System (Inside – Outside)

ISRO

Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, REST APIs, Maven, Git

- Developed a Taxi Hiring and Management System using Spring Boot to streamline vehicle booking and transportation operations.
- Implemented secure user registration and login with Spring Security-based authentication and authorization.
- The system allows employees to request taxis, manage bookings, and approve requests through a centralized platform.

CISF Equipment Management System

Space Application Centre (SAC), Ahmedabad

Spring Boot, MySQL, JWT Authentication

- Developed a web-based Equipment Management System to efficiently manage and track organizational assets.
- The system includes secure user registration and login with authentication, role-based access control, equipment inventory management, asset allocation, maintenance tracking, and reporting features.
- Implemented a centralized platform to monitor equipment status, assignment history, and maintenance schedules, improving asset utilization and operational efficiency.

Project Proposal and Management System

ISRO

- Developed a Project Proposal and Management System using Spring Boot to streamline the submission, review, approval, and tracking of project proposals across multiple ISRO centres.
- Implemented secure authentication and role-based authorization to control access based on project roles and user responsibilities.
- The system enables users to create, manage, and monitor project lifecycles through a centralized platform.

EDUCATION

MSc in Computer Applications & Information Technology (MSc CA&IT)

2016 – 2021

K S School of Business Management, Gujarat University – Ahmedabad
